

Keilbach

Mailbox Glasnost color

Farbe

- red
- black
- white
- desired color

Description

The Glasnost color mailbox is completely made of high-quality stainless steel. Stainless steel is also used under the coloured powder coating of the front.

The front is offered in

- white (RAL 9016)
- black (RAL 9017)
- red (RAL 3001).

Special designs according to your own colour ideas are possible in all RAL colours. If you decide for such a Glasnost color mailbox in the desired color, please indicate the desired RAL color code in the field " comments" when ordering.

The designer Peter Keilbach attaches great importance to high-quality materials, careful workmanship, timeless design and long life expectancy. This high-quality workmanship is shown for example by the installation of 2 damping elements. Thus the flap closes slowly and quietly. The stainless steel is between 1.5 and 2 mm thick, the mailbox weighs 9 kg. The lock was placed under the access flap. The front is closed flush with the housing. Inside, the letters are elevated on a double floor.

Matching the letterboxes, Keilbach offers tripods that carry the letterbox. These tripods are available as accessories.

Also suitable newspaper boxes are offered.

You can order a foil inscription of the Glasnost mailbox, individual logos, displays or LED lighting from us - if you are interested, please ask.
