

Keilbach

House number Big Number 480

Ausführung

- three digits
- digit
- four digits
- two digits

Description

The Big Number 480 from Keilbach is an impressive 48 cm high and thus the largest house number from the Big Number collection. It is completely made of brushed stainless steel with a material thickness of 3 mm and a weight of 2.5 kg. The house number is attached to the house wall with spacer rings.

The font "Eurostile" is used for the Big Number. It was designed in 1962 by the famous Italian typographer Aldo Novarese. The selection of the correct font is very important when designing a house number, because a house number should be optimally legible and is also an important design element on the house wall.

You can order the numbers 0 to 9 and the letters a to d from us. When ordering, please enter the desired combination of numbers and letters in the "Comments" field.
